

Example Telegram Alerts:

Open a new trade:

- Extract the name of the analyst that published the alert - only act on a list of approved analysts
- Buy the QQQ 460 Put option, expiration 9/20/24
- Sell the QQQ 445 Put option, expiration 9/20/24
- This spread trade is valid at a cost of #3.03 +/- \$0.10 or from \$2.93 to \$3.13
- If possible, retrieve the current price of the trade and see if it falls within the acceptable price range
- If the current price is not within range, log the trade and send a text notification
- If the current price is within the range, start by offering the current price
- If the order does not fill and price moves, move the order until we reach the edge of the acceptable price range
- If order fills, log Trade ID so we know we need to take future Adjust or Close notifications

Adjust an existing trade:

- Check Trade ID to see if we already opened the first part of this trade series
- Ignore this alert if we did not fill the corresponding Open alert
- place orders and send text notifications similar to Open trade alerts

Close an existing trade:

- Check Trade ID to see if we already opened this trade series
- Ignore this alert if we did not fill the corresponding Open alert
- Place orders and send text notifications similar to Open trade alerts
- All orders will be closing orders

All relevant activity should be logged for regular review
